

Consent Form for Participation in Driver Drowsiness Detection System Development

Project Title: Driver Drowsiness Detection

Supervisor: Dr. Ahmad Alzghoul

Prepared by: Jamil Hawwash, Mohammad Al-Jonaidee, Rashid Kandah

Institution: Princess Sumaya University for Technology, Department of Data Science

Purpose of the Project:

The purpose of this project is to develop a system that detects driver drowsiness in real-time to enhance road safety. Your participation involves having your facial images captured under various states (awake and drowsy) to train a deep learning model.

Procedures:

As a participant, you will be asked to sit in front of a camera, and a series of photographs will be taken of your face. These images will capture different expressions and states to simulate awake and drowsy conditions.

Confidentiality:

Your participation in this study remains confidential. The images will only be used for the purpose of this academic project. No personal data, aside from the images, will be collected or stored. The images will be hidden, and your identity will not be disclosed in any report or publication.

Voluntary Participation:

Your participation in this project is entirely voluntary. You have the right to withdraw at any time without any consequences.

Consent:

I have read the above information, and I have received answers to any questions I had. I consent to participate in the Driver Drowsiness Detection project, and I authorize the use of my images for the purposes of this academic project.

Participant's Name : Jamil Hawwash

Participant's Signature: [Signature]

Date: 13/02/2024

Witness's Name : Jamil Hawwash
